

## Collaborative thinking

**Introduction to creative thinking techniques and problem solving  
(Consider this workshop as a whole of team activity)**

The difference between effective and mediocre teams isn't so much about individual / combined mental capacity, but how well the team taps into their collective wisdom and how well the team functions together.

In this fun and interactive workshop you'll be introduced to a number of collaborative thinking tools which you and your team can readily apply to address issues, solve problems, make informed and fully-considered decisions.

### What's in this course for you?

In this **COLOURFUL** and **interactive workshop** we'll demonstrate techniques that can be easily and quickly used to:

- Identify all facets of an issue before making a decision
- Create an inclusive forum through which to explore ideas
- Facilitate effective problem solving at meetings
- Explore and evaluate proposals and project plans
- Explore options and ideas without interference from ego or emotions
- Promote optimal functioning of your team.

### A PROFESSIONAL DEVELOPMENT PROGRAM

Facilitated by

**LIZ PAINE**  
**LEARNING INSIGHT**
